

Reviewer Support for Laurie's first book:

**Financial Stewardship: A Guide for Personal Financial Health
and Wellness ©2014**

“For many of us, managing our money is a task, often unpleasant or burdensome, that we eventually have to deal with. But from the wise and gentle perspective of Laurie Bonser, financial management is not something we do, but an expression of all that we want to be. Invoking the principles of financial stewardship, she offers healing and thoughtful advice on how to infuse our approach to money with our deepest-held values and hopes for ourselves and those we love. This is a guide not to be read once and shelved, but to be kept near to our sides and hearts for regular inspiration and reflection.”

~ Eleanor Blayney, CFP®, Consumer Advocate CFP Board, President,
Directions for Women

“Laurie Bonser details how to transform our thinking to comprehensively focus on all our resources and to create the abundance mindset that will make each of us truly rich! In *Financial Stewardship* she creates a simple approach to overcome our fears and encumbrances which stop us from truly valuing ourselves and gives us the steps to transform our dreams into an abundant reality. This book is truly a gift, thank you Laurie.”

~ Diane Weklar, Weklar Business Institute

“This book is a very encouraging book to move you forward to take charge of the different aspects of your financial situation. It has a very positive, motivating tone that encourages you face your issues whatever they maybe and takes steps to be proactive in getting your financial live back on track. This book has many resources that I will be referring to in the years to come. Financial advice and explanations, books she references (that I will be following up to read) and words of advice/wisdom that can be read again and again when I need that motivation to keep on track with my financial plans.”

~ R Smith, Michigan business owner

“In a world where financial institutions appear to have stacked the deck against much of the population, Laurie has written a book on how to achieve financial success as defined by each reader’s own perspective rather than that of those who want people to fear the basic ideas of finance. Laurie presents a holistic guide to being comfortable and in control of your finances. Think of it as a meditative, organic approach to financial management and think of Laurie as a mentor, coach and provider of the encouragement that you need to tackle a topic that has become, but shouldn’t be, difficult for most people to talk about.”

~ Bryan Scott Larkin, Personal and Business Transformation Consultant

“This is a little different than the typical “how to” book for good financial health. It merges information and personal well-being as a basis for financial decisions in a way that I found honest and grounding. The 44 words/message deck in the center of the book are thought- provoking and I plan to go back to them again and again. A fast and accessible read that offers surprising depth for those looking to think a little more about what they want before rushing off to take action.”

- Liz Jasper, CA

“An enlightening read: The author provides the reader with thought-provoking questions specific to how we see ourselves through the management of our life resources. In so doing, she offers numerous insights into the areas of our lives that we may have ignored, overlooked, or just never thought about. I see this book being of value for all ages.”

- Anna W, NY

“I would recommend this book for anyone who is reluctant to take control of their finances – whether it’s because of fear or because someone else in their life manages this area. This book explores the ‘why’ or what drives our attitude around money and finances. The book is laid out in an easy to read format that allows you to step through various ‘messages’ with the goal of becoming Aware, Empowered and then take Action. At the end you will view your finances – and how they’re managed – the same way you would with your physical health. Not scary, just a part of living a healthy life.”

- K. Hickok, NY

Working with Laurie: Client Comments

'Laurie is passionate about her profession. She is never short on quick tips to help a client manage or navigate an issue. Her long-term experience as a planner is unmistakable given her depth of knowledge on any given topic.'

'Thank you for the wonderful workshop. I learned so many useful things. I started reading your book and I really liked it. What a wonderful gift you gave us yesterday.'

'Thank you for your very informative session last night. I appreciate the hard work you put into guiding women through different phases of our lives.'

'This wonderful person has tremendous experience and insight when it comes to helping you plan for your future. Worth every minute spent with her!'

'I don't know if there are many people out there that do what you do, but I am grateful to have found you! I am so unsure of so many things right now, it's a comfort to work with someone that looks at every aspect of a client's circumstances not just the financial picture. I was struck by how you seemed to pick up on things we hadn't actually mentioned, like my resistance to listen to what the universe has been trying to tell me for many years. My biggest obstacle is fear, so what I am hoping for going forward is that you stick with me through my confusion and possible resistance to certain 'scary' new concepts...together we can chip away at that 'thick skull' of mine.'

'Laurie creates a very sacred, comfortable space that allows you to feel open and balanced. Her office holds a relaxing atmosphere while maintaining the necessary qualities of professionalism. I would highly recommend her to anyone. Thank you for your compassionate services, Laurie!'

'When I came to Laurie I was feeling very anxious and ungrounded. There were many things going on career wise for me, and I was having a hard time feeling settled down in one or two particular areas. Laurie has a very calming presence about her, and worked with me to focus on just a few areas that I would nurture, vs trying to do everything. She did some energy work on me as well. After the session I felt more centered and relaxed. She also gave me some

tools to use at home to help me re-center. I highly recommend Laurie's services. She is one amazing practitioner.'

'I just wanted to touch base with you regarding your energy work. Since my visit, I've felt like a new woman. I think I had a vibrational shift of some sort, because my outlook has been so very different. Granted, I still have my days, but overall I've been in much better spirits. Thanks so much for your help last night. That session was very powerful.'

Dedication

Endless gratitude to all those supportive spirits, both
earthly and universal, who empower us with love,
discernment, and community.

About the Author.....	179

I'm writing here for those motivated people who want to replace the energy-sapping fear and stress of typical financial conversations and decisions with the *good vibrations* and healthy, thoughtful, long-term intentions associated with an abundance focus. This guide is designed as a compliment to the Law of Attraction (Abraham Hicks) principles provided by Esther and Jerry Hicks (www.AbrahamHicks.com) and the abundance message offerings of other noted spiritual voices including Lazaris (www.lazaris.com), Seth (Jane Roberts), and Frank (Tracy Farquhar).

These overarching principles of attraction, abundance, and universal connections are our inspirations and aspirations. The sole purpose of this written offering is to help you build a tangible framework for your earthly financial-related endeavors that is capable of fully supporting your whole journey within these principles. We will not be focusing here on a myriad of details or specific 'how' technical solutions, which are counter to effectively combining our earthly pursuits with universal synchronization in our highest and best interests. Rather, the repeated messages will concentrate on the very productive ways we can strengthen our inner intuitions, personal connections, and conscious choices to become higher vibrational individuals experiencing greater fulfillment, peace, and purpose.

*“The important subject of money and financial success is not the ‘root of all evil’ as many have quoted – nor is it the path to happiness. However, because the subject of money touches most of you in one way or another hundreds or even thousands of times every day, it is a large factor in your vibrational makeup and in your personal point of attraction. So when you are able to successfully control something that affects most of you all day, every day, you will have accomplished something rather significant. In other words, because such a high percentage of your thoughts in any given day reside around the topic of money or financial success, as soon as you are able to deliberately guide your thoughts, not only is it certain that your financial success must improve, but the evidence of that success will then prepare you for deliberate improvement in every aspect of your life experience.” -- **Abraham Hicks***

This book provides the very practical ideas, new perspectives, and guidance needed to support and maintain the financial abundance and quality of life you desire as part of the overall commitment to your spiritual journey and growth. The format consists of short labeled sections and chapters for ease of reading and reference. And it can easily serve as a daily resource when facing financial decisions and situations.

I was inspired and guided to combine a unique variety of professional and personal experiences to create and share this ‘bridge’ of information as a heartfelt contribution to our respective journeys. So my intention is to coach you to fish in your own expanding stream instead of providing a set mantra of steps, accomplishments, or success measurements...the latter which might at first seem comforting or attention-catching, but actually produce a man-made, lowest common denominator result.

The Law of Attraction Meets Financial Stewardship

*“My purpose is not to solve your problems for you, but to put you in touch with your own power. My purpose is not to come between you and your own freedom by giving you answers, even to the most tragic of problems. My purpose is to reinforce your own strength, for ultimately the magic of your being is well equipped to help you find fulfillment, understanding, exuberance, and peace.” -- **Seth***

There were three primary reasons I was compelled to offer the first guide on Financial Stewardship in 2014:

- 1) I seek to be part of the process for healing the fear and misinformation of how we often view and handle the area of finances in our lives.
- 2) I am engaged to raise the awareness of why financial stewardship is a vital part of our lives and how it is very much affects many other areas such as relationships, health, lifestyle, raising children, leaving a legacy, and supporting all our intentions and purpose.
- 3) I am charged to be a catalyst for people to empower themselves in this area and consequently gained greater power and fulfillment in all aspects of life.

For this new book in 2015, there was a fourth reason:

- 4) I am inspired and guided by personal study and spiritual experiences to offer this ‘bridge translation’ to help us more effectively and fully understand how to support the overarching financial abundance principles already provided by Abraham’s message and that of many other spirit teachers by *focusing on how to implement practical, personal, ongoing financial decisions in ways that support our overall higher vibrational intentions and growth.*

After *Financial Stewardship* was published, I received many requests for additional specific examples to be used by people when teaching themselves these new approaches and testing out different decision making habits. So the scenarios and situations included in each section represent real life stories for the purpose of stimulating new thought processes and consideration of options in your own life; they are not intended to be rules for copying verbatim.

We can all visualize the image of an ocean representing endless abundance and imagine the sensation of floating in a feeling of fulfillment and refreshment. However, if we don't have a practical method for converting that resource (salt water) into a consumable element (fresh water), then we are not able to consume those benefits on a human basis. So, you're going to learn how to create your own de-salination tool for earthly financial life to do your own personal part in co-creating the delivery of the desired abundance. And even if you already have a figurative in-house plumbing structure existing for fresh water, the system has to be in the 'on' position with any obstructions (such as cracks, old roots, or sediments) cleared to receive the complete free flow of benefit. It's all about actively manifesting the results, not stopping part way at the envisioning stage.

This process is also much like a spider weaving a web: individual, fine strands are put into place one by one, but each stage creates a stronger, longer lasting form. And the ultimate goal of the spider's creation is to obtain their expected sustenance and nourishment.
